

It's Better **OFF** @ Easter!

Before the Easter break you may remember seeing a number of communications reminding you to switch all non essential equipment off before the Easter break.

Why?

Last year during the Easter break the university consumed approximately £17,000 electricity, This is equivalent to the power required to operate our Olympic size swimming pool for 3 months!!

Our aim was to reduce this consumption by 10% compared to last Easter.

So how did we do?...⇒

The Results

An overall saving of
17.7%

Representing a saving of
£4,200

The **It's Better OFF** Team would like to say a **BIG THANK YOU** to all the champions and staff involved who contributed to this impressive result.

By using this method of switch off it may be possible to reduce the amount of electricity you use every day!

So remind your colleagues to switch off computers, printers and lights before they leave the office every day!

We are always looking to recruit more Environmental Champions in all areas of the University, If you would be interested if finding out more about the role, E-mail Environment@lboro.ac.uk, or have a look on our web site www.lboro.ac.uk/saveenergy
