

It's Better **OFF**

@ **Easter**

Over the 5 day Easter break in 2009 Loughborough University consumed £15,000 worth of electricity, that is the equivalent to 101 tonnes of CO2. Over

So over Easter 2010 did we manage to reduce this?

Unfortunately not!

Due to a number of sporting events across the campus over the Easter break which saw around 2000 young people using the campus, this has in turn impacted on our energy consumption.

The University increased its consumption by 11% This increase is the equivalent to £1,900 and 12 tonnes of carbon.

To find out more about how your building performed over Easter, the campaign and how you can help to reduce the energy consumed in your area visit
